Education

Florida Institute of Technology, Melbourne, FL
B.S. Computer Science Dean's List: 2024 - 2026

Experience

Esports Technician Oct 2023 - May 2026
FIT Esports Center, Melbourne, FL

- Managed 60 computers using daily checklists; troubleshoot hardware/software issues to keep a 99% return-to-service rate and minimize downtime.
- Served as primary weekly caster, coordinating run-of-show and sponsor callouts; maintained on-time segment starts and achieved 50 viewers per stream.

Software Engineer I Aug 2022 – May 2024
Project Jumpstart, Remote

- Improved overall code quality and long-term maintainability by implementing systematic debugging practices, refactoring legacy modules, and enhancing test coverage, resulting in a 30% reduction in codebase bugs.
- Coordinated a team of 8 members to ensure all deliverables were completed on schedule, balancing competing priorities and ensuring 100% of milestones were met.

Cyber Team Captain Aug 2022 – Dec 2022
FIT Cybersecurity Team, Melbourne, FL

- Directed and organized weekly team meetings, assigning tasks and aligning member contributions with competition objectives; maintained clear communication channels to ensure efficient progress tracking and accountability.
- Guided the team to a top 5 placement in the club competition (5th overall) by applying strategic planning, structured preparation, and adaptive leadership under tight deadlines.

Selected Projects

Panther Shuttle App: Senior Design Project

- Led a 4-person team in developing an Android app using Kotlin, Firebase, and Google Maps, to support three user roles.
- Utilized Git, GitHub, Jira, and Agile development practices to coordinate tasks, track issues, and deliver project milestones.

PyQt Recipe Viewer: Python Team Project

- Improved recipe navigation speed by 30% with a searchable, paginated PyQt5 interface and structured JSON parsing.
- Worked with a team to build a GUI recipe application, integrating images, search/reset functionality, and detailed recipe views.

Othello AI Game: Python Team Project

- Cut AI computation time by 50% with minimax + alpha-beta pruning, improving game responsiveness and user experience.
- Developed an interactive Othello game in Python with undo, turn-skipping, scoring, and full rule enforcement.

Technical Skills

Languages	Python, Java, Kotlin, C++, C, Go, Assembly
Tools	Git, GitHub, Jira, VS Code, Android Studio
Databases/API's	SQL, REST APIs, Firebase
Concepts	Data Structures, Algorithms, OOP, Debugging, Software Testing

Relevant Coursework

- Software Development Principles:** Algorithms and Data Structures 1 & 2.
- Mathematics:** Applied Discrete Mathematics; Linear Algebra;
- Advanced Courses:** Intro to Artificial Intelligence; Intro to Machine Learning; Computer Networks; Operating Systems; Software Testing; Programming Language Concepts; Intro to Analysis of Algorithms.

Co-curriculars

- Theta Xi Fraternity Gamma Beta Chapter**, Vice President (2024 – 2025)
- Florida Tech Fishing Club**, Treasurer (2024 – 2025)
